

Filter Project grid

1. You have the option to filter by Project ID or Project Name using text values. You can use * to include these projects with this specific text. Then select the “**Apply Filter**” button.

The screenshot shows the 'Projects' page on the CenterPoint Energy portal. At the top, there is a navigation bar with the logo and user information. Below the header, there are four filter fields: Project ID (containing '*403'), Project Name, Developer, and Service Consultant. A blue 'Apply Filter' button is positioned to the right of these fields. Below the filters is a table with columns: Project ID, Name, Section #, Project Status, Current Task, Country, Municipality, and Zip Code. The table contains one row for 'JT_0403' with details: CNP Energy, 1, In Progress, 6, United States, Humble, 77396. At the bottom, there are two more filter sections for Project Name and Project ID/Project Name, each with an 'Apply Filter' button. Below these are two task lists: 'Project Requests' and 'My all task', each with a 'Create' button and a table of tasks.

Project ID	Name	Section #	Project Status	Current Task	Country	Municipality	Zip Code
JT_0403	CNP Energy	1	In Progress	6	United States	Humble	77396

This screenshot is identical to the one on the left, but the 'Project Name' filter field contains the text '*energy'. The 'Apply Filter' button is highlighted with a blue arrow, indicating the action to be taken. The table below still shows the same project data as in the first screenshot.

2. You have the option to filter by Developer or Service Consultant using a list of values. Select the chevron icon and choose the user. Then select the **“Apply Filter”** button.
